## **Clean Bay and Storm Water Programs**

The water quality of the Santa Monica Bay is under constant and increasing stress. Pollutants on lawns, driveways, and streets are funneled through the local neighborhoods into the storm drains and end up at the ocean. On a daily basis, millions of gallons of untreated water flow into Regional lakes, rivers, harbors, bays, and the Pacific Ocean. On rainy days, it can jump up to 10 billion gallons. These polluted flows cause public health and safety concerns at the beaches, leave behind hundreds of tons of waste to be cleaned up, and cost millions of taxpayers dollars annually. Because the storm drain system in Los Angeles County does not filter or treat any kind of contaminants or debris, storm water/urban run-off has become the most significant source of water pollution in the region.

### **Federal Clean Water Act**

Storm water runoff is being addressed as a result of the 1987 amendments to the Federal Clean Water Act which established requirements for storm water discharges. The Clean Water Act requires municipalities to obtain a permit for storm water discharges into the storm drain system that leads into the Bay and the Ocean. In compliance with the Clean Water Act, the California Regional Water Quality Control Board/Los Angeles Region issues the NPDES Permit to the County of Los Angeles and its Cities. The objective of this Permit is to reduce Pollutants in storm water and urban run off, so that our regional water bodies, along with the community health and safety, are encouraged and protected. For information about the RWQCB programs call 213-576-6600 or visit website @ <http://www.swrcb.ca.gov/rwqcb4>

### **County of Los Angeles NPDES Permit**

The County and its Cities have local codes, ordinances to enforce the requirements of the NPDES Permit, the regulations set by the Clean Water Act, and the implementation of the appropriate Best Management Practices. These ordinances prohibit discharging anything but storm water into the Storm Drains. The County and Cities need your help. If you see someone dumping something into the gutter or drain inlet, please report it. To report an illegal discharge call 1-888-CLEAN LA or for more information visit County's website @ [www.888CLEANLA.com](http://www.888CLEANLA.com)

### **Cities Joint Effort Projects**

*The Clean Bay Restaurant Certification Program-* The cities above have joined together to better help the community understand these regulations. There are several programs that are being implemented by these Cities such as the Clean Bay Restaurant Certification Program. This program is being implemented with the Santa Monica Bay Restoration Commission. Restaurants are inspected and rated for their operation and practices. The restaurants that meet the highest standards for the operations that effect the Bay's water quality are Certified as Clean Bay Restaurants. You can best support this program by looking for the "Clean Bay" certification logo when you select a place to eat out.

*Bacteria Reduction Plans-* These Cities have also jointly developed plans to improve the quality of their beaches and the ocean by reducing the bacteria entering the storm drain system. Bacteria have been known to be among the major pollutants at the local beaches and the ocean. These plans include a series of programs such as educational and source identifications as well as the treatments at the end of the pipes. One important part you can play in implementing this plan is to make sure you and your neighbors pick up after "Man's Best Friend". This will reduce the impacts of this bacteria source. For information regarding your individual City and/or to inquire more about your local programs call your City at;
